the BIWAKO Biennale.

BEYOND THE SENSE — 観音 —

International Art Festival
BIWAKO BIENNALE

A fantastic live performance by two artists exploring the "other side of perception. On November 4, AWAYA's vocalist, Yumiko Okuno, will hold a voice yoga workshop.

LIVE ARTIST

**Kikoh
Matsuura**

The artist explores new aspects of the world by expressing scientifically and sensually through art, music, and science what is latent in this world in areas that cannot be grasped by human perceptual abilities.

AWAYA

Sound art unit of Masatomo Fukushima and Yumiko Okuno. In 2007, they moved to Nakaheji in Kumano, and using the sounds they hear daily in their daily life close to nature as a source of inspiration, they create "sound art works" that express the mysteries of the universe and life hidden in everyday life in their unique sound world. His activities transcend genres.

VOICE YOGA

First, close your eyes, listen to your breath in the here and now, and work meditatively to loosen your breath and voice. We become delicately aware of the sound of our own voice and breath, and enter the world of sound yoga, which has been handed down since ancient times. This is an experience that opens our ears wide. Let's be sensitive to the sounds we hear, and let's sing freely with our voices the sounds that are born inside of us. When one simply listens and sings without thinking, one is filled with the true nature and pure beauty within oneself.

※All participants of Yoga for Voice will perform in a scene of the concert, (Non-participation is OK).

Organizer: International Art Festival BIWAKO Biennale Executive Committee, Japan Arts Council, Agency for Cultural Affairs
Cooperation: Omi Hachiman Folk Culture Study Group
